VISITOR SAFETY AND SECURITY

- General rules for access to the site
- Rules inside production facilities
- Operating vehicles on the site
- Care for the environment
- Access for persons with disabilities

Our primary concern is the safety of people, the environment and our products.

Thank you for complying with these instructions.

GENERAL RULES FOR ACCESS TO THE SITE

To enter the site, you must be escorted by an employee of the company. Visitor and contractor passes issued at the central security post must be returned to the same security post each time you leave the site. You are required to stay with the escorting person at all times and may not independently move around the production facilities.

You are not allowed to photograph, film or take samples on the company's territory without the previous written permission of the head of production.

Smoking is forbidden except in specially designated areas. Violations are registered and after a warning fines apply.

RULES INSIDE PRODUCTION FACILITIES

Inside production facilities, the indicated protective clothing and equipment must be worn. Jewellery, hair accessories and similar items are not allowed.

Persons with infectious or viral diseases are not allowed to enter the production facilities.

No food, drinks, glass or plastic items may be brought into production facilities.

You must immediately inform your escort of any broken glass (e.g., from eyeglasses), lost contact lenses or similar occurrences.

Touching the products being manufactured or equipment is forbidden.

Before entering production facilities, visitors must read the company regulations and sign the Access Control Logbook.

OPERATING VEHICLES ON THE SITE

Follow the instructions of the company's employees: go directly and only to the specified loading/unloading point. OBSERVE TRAFFIC REGULATIONS.

The speed limit on the company's territory is 20 km/h.

Vehicles may only be parked in the specially designated areas.

On reaching the loading/unloading point, turn off your engine, apply the parking brake and secure the vehicle with wheel chocks.

Proceed with caution at rail crossings: stop and check for approaching trains.

CARE FOR THE ENVIRONMENT

Dispose of waste only in appropriate and properly marked containers or recycling bins.

In case of spillage of oil, chemicals or other hazardous substances, immediately notify employees of the company or security staff.

Pollution and littering of any type are prohibited. After a warning, violators will be fined.

ACCESS FOR PERSONS WITH DISABILITIES

For safety reasons, persons using crutches or other aids which limit their mobility are not allowed to enter production areas due to the risk of an accident. Access to office facilities is limited to persons who are able to move and climb stairs without assistance.
